STATEMENT BUT A "PROOF OF PUBLICATION"  
PLEASE PAY FROM BILLING STATEMENT.

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION,  
MINERAL AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS  
INTERESTED IN SECTIONS 18 AND 19, TOWNSHIP 1 SOUTH, RANGE 2  
EAST, SLBM, SALT LAKE COUNTY, UTAH.

Notice is hereby given by the Division of Oil, Gas and Mining  
of its tentative decision to approve a revision of the Mining and  
Reclamation Plan for Harper Contracting, Inc. for their Parley's  
Canyon Rock Quarry. Revised mining activities will affect the fol-  
lowing area: the SW1/4 of Section 18 and the NW1/4 of Section  
19, Township 1 South, Range 2 East, SLBM, Salt Lake County, Utah.

Harper Contracting, Inc. has submitted a revised permit ap-  
plication to expand their existing mining operation from 21.9  
acres to 56.0 acres of Patented, State and U.S. Forest Service  
land. The following mining and reclamation techniques will be  
applied:

During Operations:

Airtrack drills will be used to drill blast holes, although a larger  
production drill may be used to meet production requirements.  
The holes would then be loaded with ANFO and blasted. The  
blasted material will be pushed with a dozer to either the south-  
west or eastern edge of the mining pit where it will run down a  
slope to the process areas. The material is loaded into trucks us-  
ing a front end loader or it is transferred to a crushing/screening  
plant for further processing. The products are trucked from the site  
for distribution. The outer lip of a ridge line will act as a visual  
buffer for the active quarry area. All new roads will be located on  
private lands. Existing roads on USFS land will also be used during  
operations.

After Operations:

At the conclusion of mining, all trash, oil, fuel, equipment, debris  
and structures will be removed from the site. All remaining stock-  
piles of loose material would be graded down to slopes of 3H:1V  
or less. Any trenches would be backfilled to eliminate safety haz-  
ards. Highwalls will be left as is, with a 3 foot high safety berm in  
place at the outer edge of the bench. The overall slope angle of  
the new quarry face would be 45° or less. Quarry benches will re-  
ceive revegetation treatments. There will be no ponds or other  
impounding structures remaining after operations. Roads to be  
reclaimed will be regraded to eliminate the inner roadside  
ditches and to convey runoff across the road surface by ade-  
quately spaced water bars. Reclaimed roads and the processing  
area will be scarified to increase infiltration of water and enhance  
revegetation potential. The ripped and scarified areas will be  
treated with a composted mixture at a rate of 20 tons/acre. The  
Division approved seed mix will be broadcast over the reclaimed  
areas. Vehicle access to these reclaimed areas will be restricted  
by six foot high berms.

The person representing the company is Mr. Lawnie Mayhew;  
Phone (801) 250-0132. Harper Contracting, Inc. is fulfilling obliga-  
tions under the Utah Mined Land Reclamation Act of 1975, Utah  
Code Ann. §40-8-18.

Any person or agency aggrieved by this tentative decision  
to issue approval is hereby requested to submit written protest  
within thirty (30) days of the date of publication to Mary Ann  
Wright, Associate Director of Mining, Division of Oil, Gas and Min-  
ing, 1594 West North Temple, Suite 1210, Box 145801, Salt Lake  
City, Utah 84114-5801, setting forth factual reasons for the com-  
plaint. If no responsive written protests are received by the Divi-  
sion within 30 days after the last date of publication, the tentative  
decision of the Division will be final.

DATED THIS 14th day of September, 2000
